

THE GREAT MOSQUITO SCHEME.

Interesting correspondence between the Nicaraguan Minister, Secretary Marcy, and the Nicaragua Transit Company, etc.

LEGATION OF NICARAGUA,
NEW YORK, Nov. 22, 1854.

On the 4th of May last the undersigned had the honor to address to the Department of State a communication conveying a protest against an association which, under the title of "Central American Land and Mining Company," had been formed in New York; and covering, at the same time, a historic sketch of its origin, tendencies and objects.

In the performance of his proper duties the undersigned has attentively observed the steps and the development of the project of said company, and has now the moral conviction, as well as the evidence, that its members and associates contemplate a violation of the laws of this republic, and an invasion of the Territory of Nicaragua.

The *Herald*, of New York, of the 17th inst. contains an article which confirms previous suspicions, and sustains the actual proof in the case; but notwithstanding the little faith that may be supposed to attach to newspaper rumors, in which speculation generally overbalances truth, still the possible exaggeration, in this case, does not weaken the facts, nor discredit the reality of the danger.

The American Union has given to the world repeated proofs and guarantees of its respect for the laws and the rights of the countries with which it is at peace and harmony. The proclamation of its illustrious President against the Walker expedition in California, and against the various illegal designs on the island of Cuba, show clearly the right views of the administration which now so wisely directs the destinies of this great republic.

The tenacity with which Great Britain has sustained, and sustains to-day, her pretensions over the Mosquito coast, has given, more than once, occasion to the American government, principally at recent periods, to declare that the sovereignty over the said coast belongs, and has always belonged, to the republic of Nicaragua. Such declaration—or better, such acknowledgment—has been reproduced and confirmed by the diplomatic agents of the Union in Nicaragua, in their frequent official relations and communications with the government of that republic.

There is not, then, any doubt of the legitimacy of the rights and sovereignty of Nicaragua over all the country comprised between the Atlantic and the Pacific seas, with all the adjacent islands, and over all the territory formerly called the "Province of Nicaragua," including the region generally known under the name of the Mosquito Coast.

The invasion with which Nicaragua is now threatened has been conceived and will be accomplished, if at all, by American citizens, whose nationality should be a sufficient motive for them to abstain from participation and complicity in a project highly repugnant to the morality, by the honor, justice, and by the laws of the United States.

Invasion, force, violence, lead, and the revolver, are not to-day the efficacious elements of civilization; nor are the means and weapons whereby intelligence and industry secure its conquests for the benefit of the human family. Nor are they likely to inspire friendship, or constitute links in the chain which should bind together different nations in a common brotherhood.

The Hon. Secretary of State will recollect the assurances and guarantees which the undersigned has given to the American government of the cordial welcome which those who wish to employ their industry and capital in the country, for purposes of common utility, will be sure to find in Nicaragua. But at the same time he must manifest again to the Hon. Secretary of State that the orders and instructions of his government devolve upon him the sacred duty to oppose all enterprises which have not previously received the sanction of the competent authorities of the country.

The undersigned, confiding in the friendly and sincere dispositions of the government of the United States towards Nicaragua, cannot but invoke the application of the principles of neutrality and of the laws of this republic against all enterprises, whatever they may be, which may injure or contravene the rights and the interest of Nicaragua. And in the most earnest and cordial manner he begs the Hon. Secretary of State to be pleased to cause appropriate orders to be issued for the purpose of preventing the departure from the ports of the Union, but especially from New Orleans and New York, of any expedition or any vessels whose ostensible or secret purpose be to violate the laws of both republics, and also that such orders may be given to the commanders of the vessels of war of the United States in the Caribbean sea, or cruising in the vicinity of San Juan, as shall prevent the landing of such expeditions as may be open to reasonable suspicions.

The undersigned avails himself, &c., &c.,
J. DE MARCOLETA,
To Hon. W. L. MARCY, Secretary of State of the United States, Washington.

LEGATION OF NICARAGUA,
NEW YORK, Dec. 11, 1854.

The undersigned has informed himself of the contents of the note of the Hon. Secretary of State of the 30th ultimo, in reply to that which this legation had the honor to send on the 22d of the same month, asking for the application of the laws of the United States to the individuals of the Central American Land and Mining Company, since any such complicity would entail upon the Transit Company the loss of the exclusive privileges which it now enjoys, and the advantages which it possesses from the republic of Nicaragua.

It is only proper for me, Mr. President, to inform you that the undersigned in this matter, in order that your company may be advised of the measures which my government will take, and has, in fact, already taken, against all persons and corporations which shall, directly or indirectly, attempt to violate the rights, laws, or territories of the republic of Nicaragua. I have the honor to be, &c., &c.,
J. DE MARCOLETA.

may have contributed in a great part to bring about.

Such is the "peaceful object," and such the "business" of this company—such the purpose of the men who are connected with it, and who, with or without the consent of Nicaragua, intend to make an intrusion on her territory, a friendly State, and to appropriate to themselves the property of others.

Even on the hypothesis of such "peaceful object" as may be claimed for this company, what is the title whereby its members arrogate to themselves the right to put their feet on the soil of a foreign country, which openly opposes their plans, which protests against them, and which declares that no concession whatever will be recognized, unless it has previously received the assent of the constitutional authority of the country?

The undersigned, without intending to interfere in the acts, nor in the questions merely domestic of the American Union, may, nevertheless, be allowed to quote the authority of the supreme magistrate of this republic, in whose message to the Congress, on the 4th instant, it is proclaimed as a recognized principle that the Central American States are the only ones which have inherited from Spain the sovereignty and the lawful jurisdiction over that entire country.

It would be easy to accumulate quotations from many eminent American statesmen in support of the right and of the justice of Nicaragua in this case, but it is not sufficient to call the attention of the honorable Secretary of State to the following words of the Hon. John M. Clayton on the ratification of the treaty which bears his illustrious name:

"We have not recognized, nor can we recognize, the pretensions to sovereignty of the Mosquito King, nor of any other Indian in America. To do so would be to deny the rights of the United States over our own proper territory."

But leaving out of view these principles and just considerations, the undersigned cannot understand how it is possible to deny to the company referred to an unlawful, aggressive, hostile, and criminal character, so long as remains in full vigor and strength the treaty of the 30th July 1850, which the United States and England bound themselves reciprocally not to colonize, Costa Rica, Nicaragua, the Mosquito coast, or any part of Central America; a treaty which was published in order that the citizens whom it concerns should observe and fulfill its conditions with the respect due to the public faith thus solemnly pledged.

A powerful weapon, and as an effective argument against the British pretensions on the Mosquito coast, this treaty has been added in England—a treaty, which is now about to be violated by a handful of individuals, who, from their position and political influence, ought to be the most interested in the complete observance of all of its clauses.

The undersigned having exhausted every argument to show the illegality of the company referred to, and the justice with which Nicaragua opposes its plans and projects, knowing, in a positive manner, that the preliminaries have been taken for their consummation, and that the aggressors will soon start from New York, New Orleans or Galveston for San Juan de Nicaragua; in view of the event that the just representations of the government of Nicaragua shall not produce the desired effect—that is to say, the most complete dissolution of the existing association; and in virtue of his sacred and imperious duty, he makes here the most complete assertion of the undoubted rights of his government, as applicable to this case, in order that it may adopt such measure as circumstances may require to vindicate the same; and at the same time he protests in the most solemn manner, before God, and before the nations and governments of the civilized world, against the association or company referred to; against all of its plans and projects, and against the aggressions which it meditates on the territory, the rights, and the sovereignty of Nicaragua.

The undersigned deeply regrets the necessity of making this protest, and especially that he is obliged to put himself in opposition to the ideas and opinions, in the premises, of the Hon. Secretary of State. Availing myself of the opportunity, &c., &c.,
J. DE MARCOLETA,
To Hon. W. L. MARCY, &c., &c.

LEGATION OF NICARAGUA,
NEW YORK, Dec. 30, 1854.
To the President of the Nicaragua Accessory Transit Company—

Sir: According to information received at this legation, it appears that several of the individuals belonging to the company of which you are the President, have taken a direct and active part in the illegal projects of the so-called "Central American Land and Mining Company," and that the steamers of your company sailing to San Juan will be made use of to carry out this scheme, which is eminently criminal and violative of the sovereignty, rights, and interests of the republic of Nicaragua.

This information is, to a certain degree, confirmed by publications made in the papers of New York and other cities.

I therefore deem it my duty to inform you that this legation has protested, in due form, to the Government of the United States against the project of the above company, and that the republic of Nicaragua has not recognized, nor will it recognize, any concession or expedition which shall not receive the formal approbation of the competent authorities of the country.

It appears incredibly that a Nicaragua Company, like that of which you are President, could, in any manner, have passed or complicity in the project of the above company, and that the republic of Nicaragua has not recognized, nor will it recognize, any concession or expedition which shall not receive the formal approbation of the competent authorities of the country.

It is only proper for me, Mr. President, to inform you that the undersigned in this matter, in order that your company may be advised of the measures which my government will take, and has, in fact, already taken, against all persons and corporations which shall, directly or indirectly, attempt to violate the rights, laws, or territories of the republic of Nicaragua. I have the honor to be, &c., &c.,
J. DE MARCOLETA.

OFFICE OF THE ACCESSORY TRANSIT CO.,
NEW YORK, Jan. 2, 1855.

DEAR SIR—Your letter dated 30th ultimo is received, and the contents noted with care. In reply thereto, I beg to inform you that this company has no interest in, or connection with, the "Central American Land and Mining Company," whatever, nor has that company any application to the Transit Company to transport either persons or things to San Juan del Norte. In fact, they have made any communication to this company, of any sort, at any time.

Mr. Morgan, our President, was at one time a director of said land company, but resigned, and withdrew from it some time since. J. L. White, Esq., our counsel, was also a director; but upon being informed of the purposes of the company, he resigned, and has since been endeavoring to bring the company to the notice of the public, and to advise the governments of Nicaragua and Costa Rica, as well as our own.

The Transit company have no definite knowledge of what the Land and Mining Company propose to do. They, however, beg to assure Mr. Marcy that they disapprove any movement on the part of said company, or any other company or person, justly calculated to disturb the harmony and good understanding so happily existing between them and the government of Nicaragua.

I am, very respectfully, your ob't serv't,
THOS. LORD, Vice President of the Accessory Transit Company.
To the Hon. Sr. J. DE MARCOLETA, &c., N. Y.

Foreign Intelligence.

MORE FOREIGN DETAILS BY THE ASIA.

France.

The Emperor has granted from his private purse the magnificent pension of 6,000*fr.* a year to Madame Marrast, the widow of Armand Marrast, the eminent republican president of the constituent assembly. His majesty accompanied the grant with a letter stating that he entertained a great esteem for her late husband. M. Achille Marrast, his brother, has lately obtained a lucrative post in the management of a railway.

The *Moniteur* publishes the following letter, which has been addressed to the Minister of Foreign Affairs by the British ambassador:

"PARIS, Dec. 17.—Monsieur le Ministre, never did a more pleasing, or flattering duty devolve on me than that which I now fulfill in transmitting to your excellency the minutes of the sitting of the British Parliament of the 15th of this month, in which both houses resolved unanimously to offer their thanks to the French army and navy for the cordial co-operation and assistance which they have given to the naval and military forces of the Queen in their combined operations."

"In conformity with the usages and rules of Parliament, Field Marshal Lord Raglan and Vice Admiral Dundas will be charged to convey to General Canrobert and to Admiral Hamelin the thanks of the two Houses, but I am at the same time instructed to make known to the Emperor and the Government in what high esteem the British Parliament hold the conduct of the French army and navy, and the great satisfaction with which the Government of the Queen has seen the National Legislature unite with so much cordiality in the sentiments which it itself expresses for the imperial army and navy."

In begging your excellency to be the medium of this communication, I am, &c.,
"COWLEY."

The *Moniteur*, of Wednesday, the 20th, says "The whole of France will be deeply moved by the thanks which England has just voted; by acclamation to General Canrobert and our army, for their valiant co-operation, and their cordial assistance in the war in the East."

To this solemn manifestation, hitherto unexampled, of the sentiments of a great people towards its faithful ally, France has already replied by its admiration at the brilliant victory of the English fleet and army. She has warmly applauded the eulogiums which our General-in-Chief, after the battle of the Alma, Balaklava, and Inkermann, bestowed upon the intrepidity of Lord Raglan and his troops. The two nations, like the two armies, have done each other the most frank and the most cordial justice. While their soldiers and their sailors struggle with courage and devotion, the two nations appear to rival each other in generosity, in order to share of the glory acquired by both in common. Nothing is better calculated to draw closer their alliance than the exchange of these noble sentiments. Nothing can tend more to enlist the sympathies and the assistance of all civilized nations and hasten the definitive triumph of the holy cause which they defend."

Spain.
On the 13th a committee of the courts recommended to that body that a parliamentary investigation of the conduct of Queen Christina should be made. In the Cortes, on the 12th, Heros, Intendant of the Queen's House hold, announced that from the first of November all the royal domains, with the exception of the palaces and gardens, will pay the tax on real property. The question of suppressing the Cortes was still before the Cortes. The import duty on 300,000 per centum. Several measures by armed men had taken place at Aranjuez, and troops had been sent to repress them.

The accounts that have last reached Spain from the Havana represent the conspiracy of Baracoa to be of considerable importance, and that numerous families in the island are implicated in it. General de la Concha was employed in the most energetic measures, and he answered for the safety of the colony.

Queen Isabella II. (says the Madrid correspondent of *La Presse*) presents the Pope with a magnificent tiara worth 200,000 francs, in honor of his decision respecting the immaculate conception. The tiara is now exposed to public view at Madrid.

M. Sotelo has had a conference with the new Spanish Minister of foreign affairs. He reported to have complained of the want of kindness he had experienced, and also of the attacks of the Spanish press. It is further said that he expressed a hope that the relations between his government and that of Spain would continue on a most friendly footing; and added that, for his part, he would do everything in his power to bring all pending questions to an amicable termination.

M. Lauragui received the advances with a necessary reserve, while making a protestation of his personal desire, and of that of his government, to reconcile the maintenance of existing rights with the establishment of international relations founded on the best intelligence.

Russia.
DOMESTIC TROUBLES OF THE CAZAR.

The following private letter, dated 8th instant, has been received from St. Petersburg: "In consequence of the receipt of the affairs of the 5th of November, the Emperor has had the courtesy found the Emperor in the apartment of the Empress, awaiting the news, and he was impatient; and when the truth was declared to him he could not restrain his feelings, but broke out into the strongest expressions of dissatisfaction and anger against his Generals and his army. One exclamation which escaped him respecting his sons greatly alarmed the Empress, who was aware that they were with the Emperor. She feared that some terrible calamity had befallen them, feeling the agitation of her husband, and she came away. She remained for some time inexpressible; and it was with much difficulty that the Emperor and the attendants succeeded in restoring her to animation. She became more calm when informed that nothing had occurred to her sons, but her health has seriously suffered from the shock caused by the defeat of the army at Inkermann, and she has now to struggle against an increase of debility and a fever. The greatest alarm is felt for her, and her recovery is considered very doubtful indeed. The solemnity of the anniversary of the accession to the crown were very limited this year; they were confined to a mere religious service in the churches. Among the fears which the presence of the allied fleets had occasioned, and the danger they yet menace, you can scarcely have an idea of the desperate efforts making here to complete the armaments of every kind for next spring."

"I see that foreign journals say a good deal about the 'pacific dispositions' of our court. This I believe to be completely a mistake. The contrary is the truth. Persons placed in the strongest manner that neither the Imperial family nor the high functionaries of the empire manifest the faintest desire to accept unreservedly the conditions proposed by the Western Powers. As to Austria, every one here is furious against her, particularly since our communication which was made by Prince Gortschakoff. 'Russia will never forget or forgive her perfidy,' cried a lady the other evening in

the saloon of M—, 'For my part, I am ready to give at this moment, the contribution, 100 of my serfs for the regiment of chasseurs.' Three days after, the niece of the lady in question was appointed one of the ladies in waiting to the Empress, but the Emperor at the same time had an admonition conveyed to her to be cautious how she spoke of politics in society, and particularly in saloons which the attaches of the Austrian embassy frequented."
